

FEDERAL MILK ORDER MARKETING AND UTILIZATION SUMMARY, SEPTEMBER

HIGHLIGHTS. Handler reports of receipts and utilization under the Federal milk order system for September have been filed and tabulated. Combined totals for the 10 consolidated orders are being released. During September, about 9.5 billion pounds of milk were received from producers. This volume of milk is 9.3 percent higher than the September 2006 volume. In September 2006 and September 2007, there were significant volumes of milk not pooled due to intraorder disadvantageous price relationships. About 3.6 billion pounds of producer milk were used in Class I products, 6.2 percent lower than the previous year. Calendar composition likely had a negative impact on milk used in Class I in 2007 as compared to 2006. The all-market average Class utilization percentages were; Class I = 38%, Class II = 12%, Class III = 41%, and Class IV = 9%. The weighted average statistical uniform price was \$22.16 per cwt., \$0.12 lower than last month and \$9.30 higher than last year.

1/ Names in parentheses are the major city in the principal pricing point of the market.

2/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

3/ Due to disadvantageous relationship between intraorder class prices and the location adjusted statistical uniform (blend) price in these markets, handlers elected not to pool an estimated 280 million pounds of milk that normally would have been associated with these markets. In September 2006, the estimated not pooled volume of milk was one billion pounds, occurring in Order Nos. 33, 30, 32, and 124. After adjusting for these not-pooled volumes, the year-to-year percent change is +0.6%.
